Introduction

1.1 Project Description:

1 User Panel

- Home & Login: Users see the Home Page first and must log in or register to access full features.
- Song Upload: Logged-in users can upload songs, which go into Pending status for admin review.
- Approval & Display: Approved songs appear on the website and are highlighted in the New Releases section.
- Your Library: Users can view all their uploaded songs and their status — Approved, Pending, or Rejected.
- Profile & Artists: Users can edit their profile and view artist bios and their songs on the Artists page.

2 Admin Panel

- Admin Login: The admin logs in using a special secure admin password to access the admin dashboard.
- User & Song Management: The admin can view and delete user accounts, as well as edit or delete any uploaded song on the platform.
- Song Approval System: The admin reviews user-uploaded songs and either approves or rejects them. Approved songs appear on the user side and on the Home Page New Releases section.
- Add New Songs: The admin can directly upload new songs, which are automatically added as approved content.

Introduction

Advantages of System:

- **Free and Accessible :** Users can listen to music without a subscription on any web browser with responsive interface.
- **Personalized Experience:** Each user gets a custom dashboard to save uploaded songs and manage their music preferences.
- **Support for Creators:** Artists can upload their songs, build a profile, and share their work with listeners after admin approval.
- **Smart Features:** Includes advanced search by song, artist, or genre, genre-based browsing, and admin control for quality assurance.

List Of Modules:

A.User Module

- User registration and login.
- Access personal dashboard.
- Search and play songs.
- Listed songs to Library.
- View and edit user profile.

B. Admin Module

- Login and authentication.
- Approve or reject user-uploaded songs.
- Manage song database (add/update/delete).
- Manage user and artist accounts.

Project Profile

Project Title:	Music Vibes Website
Frontend:	HTML, CSS, React, JavaScript, Bootstrap
Backend:	Node.js, Express.js, MongoDB
Browser:	Google Chrome, Microsoft Edge, Firefox
Platform:	VS Code
Documentation Tool:	Microsoft Word

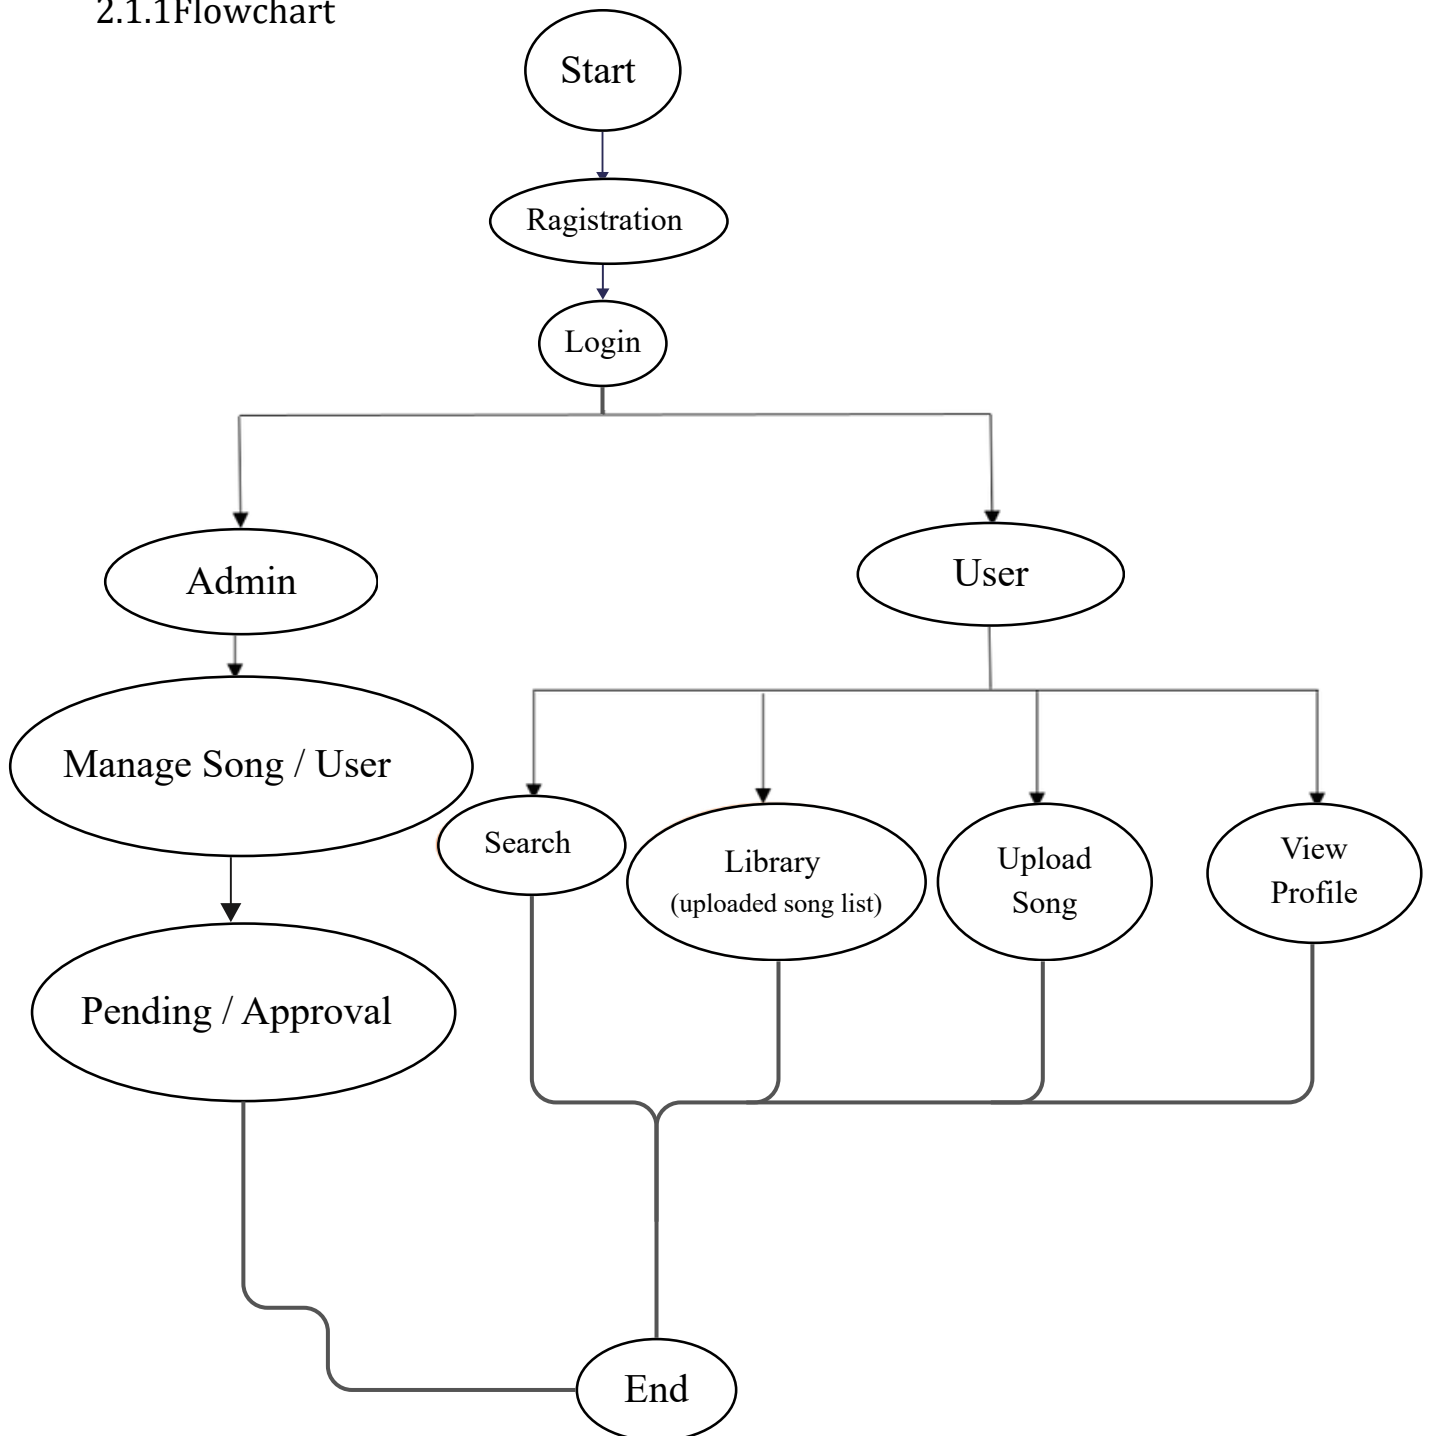

Objectives :

- To provide users a free and smooth music streaming experience.
- To allow registered users to upload their own songs and gain recognition.
- To give admins control over approving user-uploaded content for quality and authenticity.
- To enable users to search music by name, artist, or genre.
- To promote new artists by featuring their songs and displaying their biography.
- To create an engaging dashboard interface that offers personalization.

Interface Design

□ User Registrationpage

A user registration form for 'MusicVibes' is displayed on a dark background. The form includes fields for 'Full Name', 'Email Address', 'Password', and 'Confirm Password', each with a placeholder text 'enter your [field name]'. A prominent purple 'Create Account' button is at the bottom, followed by a link 'Log in here' for existing users. The background of the form is a blurred image of a desk with a microphone and cables.
